

**Topics to be taught across the year group.**

Year	Term 1		Term 2		Term 3	
<b>R</b>	<b>The World</b>  To know about similarities in relation to places , objects, materials and living things	To talk about the features of their own environment and how the environment might vary from one another	To make observations of animals and plants and explain why some things occur, and talk about changes.	To know importance for good health of physical exercise and a healthy diet.	To manage basic hygiene.	Forest school
<b>1</b>	<b>Plants</b>  Identify and name common garden plants  To know basic structure	<b>Seasonal Changes</b>  Observe changes over the year.  Observe and describe weather associated with seasons. How day length varies	<b>Everyday Materials</b>  Distinguish between an object and the material from which it is made.  Identify & name everyday materials.  Describe physical properties of a variety of materials  Compare and group together a variety of everyday materials on the basis of their physical properties	<b>Animals incl. humans</b>  Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals.  Identify and name a variety of common animals that are carnivores, herbivores and omnivores	<b>Seasonal changes</b>	
<b>2</b>	<b>Everyday materials</b>  Identify and compare the suitability of a variety of everyday materials including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses.  Find out how shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching	<b>Plants</b>  Observe and describe how seeds and bulbs grow into mature plants  Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	<b>Living things and their habitats</b>  Explore and compare the differences between things that are living, dead and things that have never been alive.  Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other.  Describe how animals obtain their food from plants and other animals using the idea of a simple food chain and identify and name different sources of food	<b>Animals incl humans</b>  Notice that animals including humans have offspring which grow into adults  Find out about and describe the basic needs of animals including humans for survival (water, food and air)		
<b>3</b>	<b>Plants</b>  Identify and describe the functions of different parts of flowering plants, roots, stem/trunk, leaves and flowers.  Explore the requirements of plants for life & growth, (air, light, water, nutrients from soil room to grow) and how they vary from plant to plant.	<b>Animals incl humans</b>  Identify that animals incl humans need the right types and amount of nutrition and that they cannot make their own food, they get nutrition from what they eat.  Identify that humans and some other animals have skeletons and muscles for support, protection and movement.	<b>Forces</b>  Compare how things move on different surfaces.  Notice that some forces need contact between tow objects, but magnetic forces can act at a distance	<b>Magnets</b>  Observe how magnets attract or repel each other and attract some materials and not others  Compare and group a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials.  Describe magnets as having two poles.  Predict whether two magnets	<b>Light</b>  Recognise that they need light in order to see things and that the dark is the absence of light.  Notice that light is reflected form surfaces.  Recognise that light from the sun can be dangerous and that there are ways to protect their eyes.  Recognise that shadows are formed when the light from a	<b>Rocks</b>  Compare and group together different kinds of rocks on the basis of appearance and simple physical properties.  Describe in simple terms how fossils are formed when things that have lived are trapped within rocks.  Recognise that soils are made from rocks and organic matter.

				will attract or repel each other, depending on which poles are facing.	light source is blocked by a solid object.  Find patterns in the way that the size of shadows change.	
<b>4</b>	<b>Animals incl humans</b>  Describe the simple functions of the basic parts of the digestive system in humans.  Identify the different types of teeth in humans and their simple functions.  Construct and interpret a variety of food chains, identifying producers, predators and prey.	<b>States of matter</b>  Compare and group materials together according to whether they are solids, liquids or gases.  Observe that some materials change stat when they are heated or cooled and measure or research the temperature at which this happens in degrees Celsius  Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature	<b>Electricity</b>  Identify common appliances that run on electricity.  Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers.  Identify whether or not a lamp will light a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery.  Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.  Recognise some common conductors and insulators, and associate metals with being god conductors.	<b>Living things &amp; their habitat</b>  Recognise that living things can be grouped in a variety of ways.  Explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment.  Recognise that environments can change and that this can sometimes pose dangers to living things.	<b>Sound</b>  Identify how sounds are made, associating some of them with something vibrating.  Recognise that vibrations from sounds travel through a medium to the ear.  Find patterns between the pitch of a sound and features of the object that produced it.  Find patterns between the volume of a sound and the strength of the vibrations that produced it.  Recognise that sounds get fainter as the distance from the sound increases.	
<b>5</b>	<b>Properties and changes of materials</b>  Compare and group together everyday materials on the basis of their properties, including hardness, solubility, transparency, conductivity (electrical and thermal) and response to magnets.  Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution.  Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating.  Give reasons based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic.	<b>Animals incl humans</b>  Descibe the changes as humans develop to old age.	<b>Earth and space</b>  Describe the movement of the Earth, and other planets, relative to the Sun in the solar system.  Describe the movement of the Moon relative to the Earth.  Describe the Sun, Earth and Moon as approximately spherical bodies.  Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across	<b>Living things and their habitat</b>  Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird.  Describe the life process of reproduction in some plants and animals.	<b>Forces</b>  Explain that unsupported objects fall toward the Earth because of the force of gravity acting between the Earth and falling object.  Identify the effects of air resistance, water resistance and friction, that act between moving surfaces.	

	<p>Demonstrate that dissolving, mixing and changes of state are reversible changes.</p> <p>Explain that some changes result in the formation of new materials and that this kind of change is not usually reversible including changes associated with burning and the action of acid on bicarbonate of soda.</p>			the sky.		
6	<p><b>Living things and habitats</b></p> <p>Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals.</p> <p>Give reasons for classifying plants and animals based on specific characteristics.</p>	<p><b>Animals incl humans</b></p> <p>Identify and name the main parts of the human circulatory system, and describe the functions of the heart.</p> <p>Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function.</p>	<p><b>Light</b></p> <p>Recognise that light appears to travel in straight lines.</p> <p>Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye.</p> <p>Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.</p> <p>Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.</p>	<p><b>Electricity</b></p> <p>Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.</p> <p>Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off of switches.</p> <p>Use recognised symbols when representing a simple circuit in a diagram.</p>	Revision for SATS	<p><b>Evolution and inheritance.</b></p> <p>Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.</p> <p>Recognise that living things produce offspring of the same kind, but normally offspring vary and re not identical to their parents.</p> <p>Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.</p>

Green –Biology

Red – Physics

Blue - Chemistry
